18:45

NOVERMBER 14 th 2015	
Session I Chairs: Shusen Liu / Min-Xin Guan William Mong Building (家民作校) 8:30-9:10 Mitochondrial genetics and epigenetics Douglas C. Wallace University of Pennsylvania, Philadelphia 9:10-9:50 Metabolic control of mitochondrial dynamics David C. Chan California Institute of Technology, Pasadena 9:50-10:00 Coffee Break Session II Chairs: Yau-Huei Wei / Masashi Tanaka 10:00-10:25 New mechanisms of neurodegeneration in mitochondrial disorders Mechanism of cellular degeneration induced by mitochondrial membrane Xin Jie Chen State University of New York Upstate Medical University, Syracuse Molecular pathogenesis of mitochondrial disease caused by tRNA modification deficiency Molecular pathogenesis of mitochondrial machinery Baylor College of Medicine, Houston Min-Xin Guan Zhejiang University, Hangzhou 11:40-12:00 Mitochondrial deafness Min-Xin Guan Zhejiang University, Hangzhou 12:00-13:30 Lunch Poster Presentation 12:00-13:30 ASMRM Council Meeting Room 123, College of Life Sciences	
8:30-9:10 Mitochondrial genetics and epigenetics Douglas C. Wallace University of Pennsylvania, Philadelphia 9:10-9:50 Metabolic control of mitochondrial dynamics David C. Chan California Institute of Technology, Pasadena 9:50-10:00 Coffee Break Session II Chairs: Yau-Huei Wei / Masashi Tanaka 10:00-10:25 New mechanisms of neurodegeneration in mitochondrial disorders MRC-Mitochondrial Biology Unit, Cambridge Mechanism of cellular degeneration induced by mitochondrial membrane Xin Jie Chen State University of New York Upstate Medical University, Syracuse 10:50-11:15 Molecular pathogenesis of mitochondrial disease caused by tRNA modification deficiency Tsutomu Suzuki University of Tokyo, Tokyo 11:15-11:40 Molecular defects in mitochondrial protein translation machinery Beauto College of Medicine, Houston Min-Xin Guan Zhejiang University, Hangzhou 12:00-12:30 Lunch Poster Presentation 12:00-12:30 Luncheon Seminar Zhejiang DIAN Diagnostics Co., Ltd. Hangzhou 12:30-13:30 ASMRM Council Meeting Room 123, College of Life Sciences	
Metabolic control of mitochondrial dynamics 9:10-9:50 Metabolic control of mitochondrial dynamics Coffee Break Session II Chairs: Yau-Huei Wei / Masashi Tanaka 10:00-10:25 New mechanisms of neurodegeneration in mitochondrial disorders Mechanism of cellular degeneration induced by mitochondrial membrane Xin Jie Chen State University of New York Upstate Medical University, Syracuse Molecular pathogenesis of mitochondrial disease caused by tRNA modification deficiency 10:50-11:15 Molecular defects in mitochondrial protein translation machinery Mitochondrial deafness Mitochondrial deafness Mitochondrial deafness Massimo Zeviani MRC-Mitochondrial Biology Unit, Cambridge Mascimo Zeviani MRC-Mitochondrial Biology Unit, Cambridge Machanism of cellular degeneration induced by mitochondrial membrane Xin Jie Chen State University of New York Upstate Medical University, Syracuse Molecular pathogenesis of mitochondrial disease caused by tRNA modification deficiency Molecular defects in mitochondrial protein translation machinery Baylor College of Medicine, Houston Min-Xin Guan Zhejiang University, Hangzhou 12:00-13:30 Lunch Poster Presentation Zhejiang DIAN Diagnostics Co., Ltd. Hangzhou 12:30-13:30 ASMRM Council Meeting Room 123, College of Life Sciences	
9:50-10:00 Coffee Break Session II Chairs: Yau-Huei Wei / Masashi Tanaka 10:00-10:25 New mechanisms of neurodegeneration in mitochondrial disorders Mechanism of cellular degeneration induced by mitochondrial membrane proteostatic stress State University of New York Upstate Medical University, Syracuse Molecular pathogenesis of mitochondrial disease caused by tRNA modification deficiency Molecular defects in mitochondrial protein translation machinery Mitochondrial deafness Mitochondrial Mitochondrial deafness Mitochondrial deafness Mitochondrial Mitoch	
Session II Chairs: Yau-Huei Wei / Masashi Tanaka 10:00-10:25 New mechanisms of neurodegeneration in mitochondrial disorders MRC-Mitochondrial Biology Unit, Cambridge 10:25-10:50 Mechanism of cellular degeneration induced by mitochondrial membrane Xin Jie Chen proteostatic stress State University of New York Upstate Medical University, Syracuse Molecular pathogenesis of mitochondrial disease caused by tRNA modification deficiency University of Tokyo, Tokyo 11:15-11:40 Molecular defects in mitochondrial protein translation machinery Baylor College of Medicine, Houston Min-Xin Guan Zhejiang University, Hangzhou 12:00-13:30 Lunch Poster Presentation 12:00-12:30 Luncheon Seminar Zhejiang DIAN Diagnostics Co., Ltd. Hangzhou 12:30-13:30 ASMRM Council Meeting Room 123, College of Life Sciences	
10:00-10:25 New mechanisms of neurodegeneration in mitochondrial disorders Massimo Zeviani MRC-Mitochondrial Biology Unit, Cambridge 10:25-10:50 Mechanism of cellular degeneration induced by mitochondrial membrane proteostatic stress 10:50-11:15 Molecular pathogenesis of mitochondrial disease caused by tRNA modification deficiency 11:15-11:40 Molecular defects in mitochondrial protein translation machinery Lee-Jun C. Wong Baylor College of Medicine, Houston Min-Xin Guan Zhejiang University, Hangzhou 12:00-13:30 Lunch Poster Presentation Zhejiang DIAN Diagnostics Co., Ltd. Hangzhou 12:30-13:30 ASMRM Council Meeting Room 123, College of Life Sciences	
10:00-10:25 New mechanisms of neurodegeneration in mitochondrial disorders MRC-Mitochondrial Biology Unit, Cambridge Mechanism of cellular degeneration induced by mitochondrial membrane proteostatic stress Molecular pathogenesis of mitochondrial disease caused by tRNA modification deficiency Molecular defects in mitochondrial protein translation machinery Molecular defects in mitochondrial protein translation machinery Mitochondrial deafness Mitochondrial deafness Mitochondrial deafness Min-Xin Guan Zhejiang University, Hangzhou Min-Xin Guan Zhejiang University, Hangzhou Min-Xin Guan Zhejiang DIAN Diagnostics Co., Ltd. Hangzhou	
proteostatic stress Molecular pathogenesis of mitochondrial disease caused by tRNA modification deficiency 11:15-11:40 Molecular defects in mitochondrial protein translation machinery 11:40-12:00 Mitochondrial deafness Mitochondrial deafness State University of New York Upstate Medical University, Syracuse Tsutomu Suzuki University of Tokyo, Tokyo Lee-Jun C. Wong Baylor College of Medicine, Houston Min-Xin Guan Zhejiang University, Hangzhou 12:00-13:30 Lunch Poster Presentation Zhejiang DIAN Diagnostics Co., Ltd. Hangzhou 12:30-13:30 ASMRM Council Meeting Room 123, College of Life Sciences	
10:50-11:15 modification deficiency University of Tokyo, Tokyo Lee-Jun C. Wong Baylor College of Medicine, Houston Mitochondrial deafness Mitochondrial deafness Min-Xin Guan Zhejiang University, Hangzhou 12:00-13:30 Lunch Poster Presentation 12:00-12:30 Luncheon Seminar Zhejiang DIAN Diagnostics Co., Ltd. Hangzhou 12:30-13:30 ASMRM Council Meeting Room 123, College of Life Sciences	
11:15-11:40 Mitochondrial deafness Mitochondrial deafness Mitochondrial deafness Mitochondrial deafness Mitochondrial deafness Min-Xin Guan Zhejiang University, Hangzhou 12:00-13:30 Lunch Poster Presentation 12:00-12:30 Luncheon Seminar Zhejiang DIAN Diagnostics Co., Ltd. Hangzhou 12:30-13:30 ASMRM Council Meeting Room 123, College of Life Sciences	
11:40-12:00 Mitochondrial deafness Zhejiang University, Hangzhou 12:00-13:30 Lunch Poster Presentation 12:00-12:30 Luncheon Seminar Zhejiang DIAN Diagnostics Co., Ltd. Hangzhou 12:30-13:30 ASMRM Council Meeting Room 123, College of Life Sciences	
12:00-12:30 Luncheon Seminar Zhejiang DIAN Diagnostics Co., Ltd. Hangzhou 12:30-13:30 ASMRM Council Meeting Room 123, College of Life Sciences	
12:30-13:30 ASMRM Council Meeting Room 123, College of Life Sciences	
Session III Chairs: Hong-Kyu Lee / Quan Chen William Mong Building (蒙民伟楼)	
13:30-13:55 Mitochondrial dysfunction and dysregulation of Ca ²⁺ homeostasis in insulin insensitivity and diabetes Yau-Huei Wei Mackay Medical College, Taipei	
13:55-14:20 Endocrine disrupting chemicals, mitochondrial dysfunction and metabolic Hong-Kyu Lee syndrome Eulji University, Seongnam	
Application of whole-exome sequencing to identify novel disease causing genes associated with mitochondrial diseases. Taosheng Huang Cincinnati Children's Hospital Medical Center, Cincinnati	
14:45-15:10 Challenge to the diagnosis of mitochondrial disease in clinical practice Chuanzhu Yan Shandong University, Jinan	
15:10-15:35 GDF15 is a novel biomarker to evaluate efficacy of pyruvate therapy for mitochondrial disorders Masashi Tanaka Tokyo Metropolitan Institute of Gerontology, Tokyo	
15:35-15:45 Coffee Break	
Session IV Chairs: Myung-Shik Lee / Yong Zhang	
15:45-16:05 Cytosolic PINK1 and mitophagy-controversies and implications for Parkinson's disease Kah-Leong LIM National University of Singapore, Singapore	
16:05-16:25 Autophagy deficiency in myeloid cells leads to impaired mitochondrial function, increased inflammasome activation and metabolic syndrome Myung-Shik Lee Yonsei University, Seoul	
16:25-16:45 Integrated nano/micro technology in addressing mitochondria diseases Dar-Bin Shieh National Cheng Kung University, Tainan	
16:45-17:05 Mitochondrial genetic defects and neurological disorders Zhi-Ying Wu Zhejiang University, Hangzhou	
17:05-17:25 Mitochondrial DNA rare variants are genetic risk factors for type 2 diabetes mellitus in Chinese population Wenzhou Medical University, Wenzhou	
17:25-17:45 Functional role of respiratory supercomplexes José Antonio Enriquez Dominguez Centro Nacional de Investigaciònes Cardiovasculares Carlos III, Mad	
Whole exome analysis of mitochondrial respiratory chain disorders: Prenatal genetic diagnosis Taro Yamazaki Saitama Medical University, Saitama	d

Banquet (Poster Awards)

NOVERMBER 15th 2015

8:00-8:20 Molecular interplay of mitochondrial dynamic with receptor-mediated mitophagy 8:20-8:40 Mitochondrial fission and stress 8:40-9:00 Transcriptional control of cardiac mitochondrial biogenesis and maturation 9:00-9:20 Mitochondrial function in stem cell differentiation 9:20-9:40 Systemic homeostatic adjustment of energy metabolism in tissue-specific mitochondrial dysfunction 9:40-10:00 Targeting mitochondria to prevent age-associated diseases with nutraceuticals: Hydroxytytrosol is a rising star after resveratrol 10:00-10:30 Exercise-induced mitochondrial homeostasis mediates myokine biological effects in muscle Mitochondrial protection mitochondrial homeostasis and redox signaling: insight learned from muscle Quan Chen Chinese Academy of Sciences, Beijing Alexander M. van der Bliek University of California, Los Angeles Daniel P. Kelly Sanford Burnham Prebys Medical Discovery Institute, Orlando Jin Han Inje University, Busan Mino Shong Chungnam National University, Daejeon Jiankang Liu Xi'an Jiaotong University, Xi'an Coffee Break Chairs: Dongchon Kang / Minho Shong Exercise-induced mitochondrial homeostasis mediates myokine biological effects in muscle Mitochondrial homeostasis and redox signaling: insight learned from muscle Li Li Ji	
8:20-8:40 Mitochondrial fission and stress 8:40-9:00 Transcriptional control of cardiac mitochondrial biogenesis and maturation 9:00-9:20 Mitochondrial function in stem cell differentiation 9:20-9:40 Systemic homeostatic adjustment of energy metabolism in tissue-specific mitochondrial dysfunction 9:40-10:00 Targeting mitochondria to prevent age-associated diseases with nutraceuticals: Hydroxytytrosol is a rising star after resveratrol Coffee Break Chairs: Dongchon Kang / Minho Shong Exercise-induced mitochondrial homeostasis mediates myokine biological effects in muscle Mitochondrial homeostasis and redox signaling; insight learned from muscle Li Li Li Mitochondrial fission and stress Alexander M. van der Bliek University of California, Los Angeles Daniel P. Kelly Sanford Burnham Prebys Medical Discovery Institute, Orlando Jin Han Inje University, Busan Minho Shong Chungnam National University, Daejeon Jiankang Liu Xi'an Jiaotong University, Xi'an Coffee Break	
8:40-9:00 Transcriptional control of cardiac mitochondrial biogenesis and maturation 9:00-9:20 Mitochondrial function in stem cell differentiation 9:20-9:40 9:20-9:40 Transcriptional control of cardiac mitochondrial biogenesis and maturation 9:40-10:00 Transcriptional control of cardiac mitochondrial biogenesis and maturation Jin Han Inje University, Busan Minho Shong Chungnam National University, Daejeon Jiankang Liu Xi'an Jiaotong University, Xi'an Coffee Break Chairs: Dongchon Kang / Minho Shong Exercise-induced mitochondrial homeostasis mediates myokine biological effects in muscle Mitochondrial homeostasis and redox signaling; insight learned from muscle Li Li Li Mitochondrial homeostasis and redox signaling; insight learned from muscle Li Li Li Mitochondrial homeostasis and redox signaling; insight learned from muscle Li Li Li Mitochondrial homeostasis and redox signaling; insight learned from muscle Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li	
9:20-9:40 Systemic homeostatic adjustment of energy metabolism in tissue-specific mitochondrial dysfunction Chungnam National University, Daejeon 9:40-10:00 Targeting mitochondria to prevent age-associated diseases with nutraceuticals: Hydroxytytrosol is a rising star after resveratrol Xi'an Jiaotong University, Xi'an 10:00-10:10 Coffee Break Chairs: Dongchon Kang / Minho Shong Exercise-induced mitochondrial homeostasis mediates myokine biological effects in muscle Mitochondrial homeostasis and redox signaling; insight learned from muscle Mitochondrial homeostasis and redox signaling; insight learned from muscle Li Li Li Mitochondrial homeostasis and redox signaling; insight learned from muscle Li Li Li Mitochondrial homeostasis and redox signaling; insight learned from muscle Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li	
9:20-9:40 Systemic homeostatic adjustment of energy metabolism in tissue-specific mitochondrial dysfunction 1 Targeting mitochondria to prevent age-associated diseases with nutraceuticals: Hydroxytytrosol is a rising star after resveratrol 10:00-10:10 Coffee Break Chairs: Dongchon Kang / Minho Shong Exercise-induced mitochondrial homeostasis mediates myokine biological effects in muscle Mitochondrial homeostasis and redox signaling; insight learned from muscle Li Li Li Minho Shong Chungnam National University, Daejeon Jiankang Liu Xi'an Jiantong University, Xi'an Yong Zhang Tianjin University of Sport, Tianjin	
9:40-10:00 Targeting mitochondria to prevent age-associated diseases with nutraceuticals: Hydroxytytrosol is a rising star after resveratrol Coffee Break Chairs: Dongchon Kang / Minho Shong Exercise-induced mitochondrial homeostasis mediates myokine biological effects in muscle Mitochondrial homeostasis and redox signaling; insight learned from muscle Li Li Li Mitochondrial homeostasis and redox signaling; insight learned from muscle Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li Li	
10:00-10:10 Coffee Break Chairs: Dongchon Kang / Minho Shong Exercise-induced mitochondrial homeostasis mediates myokine biological effects in muscle Mitochondrial homeostasis and redox signaling; insight learned from muscle Mitochondrial homeostasis and redox signaling; insight learned from muscle Li Li Li	
10:10-10:30 Chairs: Dongchon Kang / Minho Shong Exercise-induced mitochondrial homeostasis mediates myokine biological effects in muscle Mitochondrial homeostasis and redox signaling; insight learned from muscle Li Li Li Mitochondrial homeostasis and redox signaling; insight learned from muscle Li Li Li Mitochondrial homeostasis and redox signaling; insight learned from muscle Li Li Li Mitochondrial homeostasis and redox signaling; insight learned from muscle Li Li Li Mitochondrial homeostasis and redox signaling; insight learned from muscle	
10:10-10:30 Exercise-induced mitochondrial homeostasis mediates myokine biological yong Zhang effects in muscle Tianjin University of Sport, Tianjin University o	
effects in muscle Hanjin University of Sport, Hanjin Mitochondrial homeostasis and radov signaling: insight learned from muscle Li Li Li	
atrophy University of Minnesota Twin Cities, Minneapolis	
10:50-11:10 Molecular mechanisms of metabolic reprogramming and other oxidative stress protective pathways; lessons from inborn errors of fatty acid oxidation Aarhus University, Aarhus	
11:10-11:30 Dynamics of respiratory complex assembly Yidong Bai University of Texas Health Science Center at San Antonio, San	Antonio
11:30-11:50 Mitochondrial signaling in disuse-induced skeletal muscle atrophy Scott K. Powers University of Florida, Gainesville	
11:50-12:10 The role of mitochondria in aerobic trainability Zsolt Radak University of Physical Education, Budapest	
12:10-12:30 Regulation of Parkin and its substrate VDAC Jongkyeong Chung Seoul National University, Seoul	
12:30-13:30 Lunch	
Session VI Chairs: Huangen Ding / Mou-Chieh Kao Zijinggang Hall, Alumni Center (校友楼/紫金港厅)	
13:30-13:50 Cdh1 regulates tumorigenesis and craniofacial development via the WWP2/Goosecoid signaling axis Wenyi Wei Harvard Medical School, Boston	
13:50-14:10 Mitochondrial p32 is essential for OXPHOS and TLR-mediated activation in dendritic cells Mitochondrial p32 is essential for OXPHOS and TLR-mediated activation in Months (Kyushu University, Fukuoka Kyushu University, Fukuoka	
14:10-14:30 Redox signaling of mitochondrial outer membrane protein mitoNEET Huangen Ding Louisiana State University, Baton Rouge	
Allo-/xenogeneic transplantation of peptide-labelled mitochondria in Parkinson' chin-San Liu s disease: restoration of mitochondria functions and attenuation of 6-OHDA-induced neurotoxicity	
14:50-15:10 Functional characterization, dual localization and post-translational modifications of NDUFS7 subunit in human mitochondrial complex I Mou-Chieh Kao National Tsing Hua University, Hsinchu	
15:10-15:20 Coffee Break	
Chairs: Zhiyin Song / Xingguo Liu	
15:20-15:40 The role of fusion in mitochondrial quality control Wei Yuan Yang Academia Sinica, Taipei	
The role of MICOS complex in mitochondrial dynamics and mtDNA nucleoid Zhiyin Song organization The role of MICOS complex in mitochondrial dynamics and mtDNA nucleoid Wuhan University, Wuhan	
16:00-16:20 Impairment of mitochondrial respiratory function as an early biomarker of apoptosis induced by growth factor removal Erich Gnaiger Innsbruck Medical University, Innsbruck	
16:20-16:40 Study on the relationship between mitochondrial DNA mutation and pathology Xingguo Liu Chinese Academy of Sciences, Guangzhou	
Session VII Chairs: Jianxin Lyu / Chuanzhu Yan Xixi Hall, Alumni Center (校友楼/西溪厅)	
13:30-13:50 RAS-RAF-MEK pathway protects neuronal atrophy caused by motor protein malfunction and mitochondrial impairment Jian-Sheng Kang Chinese Academy of Sciences, Shanghai	
Sensitizing human leukemia cells to apoptosis induction by inhibition of fatty acid oxidation Sensitizing human leukemia cells to apoptosis induction by inhibition of fatty Ye Chen Zhejiang University, Hangzhou	
14:10-14:30 Mitochondrial genome instability and tumorigenesis Jinliang Xing Fourth Military Medical University, Xi'an	
14:30-14:50 Mitochondrial damage-associated molecular patterns in the regulation of immune response Xiawei Wei Sichuan University, Chengdu	
14:50-15:10 Nuclear genes in Leber's hereditary optic neuropathy Pingping Jiang Zhejiang University, Hangzhou	
15:10-15:20 Coffee Break	
Chairs: Zhi-Ying Wu / Taosheng Huang	
15:20-15:40 Crosstalk between mitochondrial fusion and the Hippo pathway in controlling cell proliferation during <i>Drosophila</i> development Wanzhong Ge Zhejiang University, Hangzhou	
15:40-16:00 The Dual role of mitochondrion in T-2 toxin response Peiqiang Mu South China Agricultural University, Guangzhou	
16:00-17:00 Trainee Presentation	

1
